

## Fonction de suppression des commentaires HTML en python

Soumis par DOTNET

12-07-2009

Dernière mise à jour : 12-07-2009

```
.py-keyword1 {color: #0033CC; font-weight: bold;}  
.py-keyword2 {color: #CE3333; font-weight: bold;}  
.py-keyword3 {color: #660066; font-weight: bold;}  
.py-number {color: #993300;}  
.py-docstring {color: #E86A18;}  
.py-quote {color: #878787; font-weight: bold;}  
.py-comment {color: #009900; font-style: italic;}
```

```
#supprime les commentaires HTML  
def delTagMS( sContent ):  
    sTag_start = "<!--"  
    sTag_stop = "-->"  
    iPos_start = sContent.find( sTag_start )  
    if not iPos_start > -1:  
        return sContent  
    iPos_stop = sContent.find( sTag_stop, iPos_start ) + len( sTag_stop )  
    sContent = sContent[ 0 : iPos_start ] + sContent[ iPos_stop : ]  
  
    return delTagMS( sContent )
```
